EDUCATION

University of Connecticut

Ph.D. in Statistics

Storrs, CT, USA

December 2023

Xi'an Jiaotong University

B.S. in Computational Mathematics

Xi'an, China

May 2018

TECHNICAL SKILLS

Programming: R, SAS, C++, MATLAB, Python

Tools: Microsoft Office, LaTeX, Git, HPC Cluster, Slurm Workload Manager

EXPERIENCE

U.S. Food and Drug Administration

Silver Spring, MD, USA

Center for Biologics Evaluation and Research, Office of Biostatistics and Pharmacovigilance

April 2024–Present

Visiting Associate

- Conduct statistical reviews of Chemistry, Manufacturing, and Controls (CMC) submissions, evaluating study design, analytical methods, statistical validity, and the adequacy of evidence supporting biologics-related regulatory decisions.
- Review clinical trial submissions for medical products, assessing statistical analysis plans, endpoint definitions, study design, and interpretation of efficacy and safety evidence.

University of Connecticut

Farmington, CT, USA

UConn Health, The Cato T. Laurencin Institute for Regenerative Engineering

August 2021–December 2023

Graduate Assistant

- Provided statistical consulting to medical researchers and physicians, including study design guidance, data analysis planning, model selection, and interpretation of clinical research findings.
- Conducted statistical analyses using clinical, survey, and patient-level data, applying regression models, survival analysis, hypothesis testing, and data visualization to support medical research publications.

University of Connecticut

Storrs, CT, USA

College of Liberal Arts and Sciences, Department of Statistics

August 2020–May 2021

Graduate Assistant

- Conducted research on optimal subsampling method for parametric accelerated failure time models with massive survival data.
- Developed computational algorithms and R-based implementation for efficient analysis of large-scale censored survival datasets.

PRESENTATIONS

- **Optimal Subsampling for Parametric Accelerated Failure Time Models with Massive Survival Data.** Joint Statistical Meetings, Washington, DC, August 2022.
- **Subsampling Approach for Least Squares Fitting of Semiparametric Accelerated Failure Time Models to Massive Survival Data.** ICSA Applied Statistics Symposium, Ann Arbor, MI, June 2023.

HONORS AND AWARDS

- Lifetime Data Science (LiDS) Student Paper Award, American Statistical Association, 2022
- Honorable Mention, Student Paper Competition, International Chinese Statistical Association (ICSA), 2023
